

A
ESTHETIC

keep it simple

Gevasol is a group of companies with expertise centered in the Aesthetic equipment market. Gevasol engineers work collaboratively with medical OEM customers to develop unique pneumatic and fluidic control assemblies. We use our expertise in fluid automation, fluidics, pneumatics, magnetics, & system controls to make our customers products better.

ISO 13456 certified for the
Medical equipment industry

Geva Sol Group
Geva

Proportional valves

Regulate the vacuum pressure

- 2 Way proportional valve
- Precision control
- Compact 16mm design integrated into hand piece
- High speed
- Low power

Skin pulsating manifold

Regulate vacuum pulsation

- Manifold machining optimized for pulsed flow
- Hi flow / high speed valves
- Combined (8mm) 3/2 solenoid and 2/2 solenoid
- Integrated fittings and electrical connections

Liquid Controls

Diverting manifold for laser cooling in hair removal machine

- AISI 316 (CF8-M Cast) body
- Designed for long life
- Ionized water
- Low power
