

Dugit - A High-performance Drive

gevasol  
**Ping**

December 2022

- Harsh environments
- Defense

## Swift, accurate, and energy-efficient control for extreme conditions.

GFT's new drive implements positional control of a launcher used for active defense in armored vehicles.

The conditions in which it operates mandate fast response, high accuracy, and efficient power consumption.

- Two axes
- Supply: 400Vdc
- Peak current (A)
  - Main axis: 50
  - Secondary axis: 80
- Integrated gain scheduling control
- Support of defined parameters storage within the motor
