

Home Pour-Over Coffee Brewing: Simplified

gevasol Ping

January | 2024

- Home appliances
- Specialty coffee

Developed by Kaufman R&D,
Gevasol's System Engineering Experts

The Challenge

- Precise measuring equipment and expertise are necessary for accurate pour-over coffee.
- The precision is crucial for accurately measuring coffee and pouring hot water for a specific 2-minute duration.
- This requirement **restricts the potential market** for home coffee brewing.

The Solution

Our device simplifies pour-over coffee preparation, eliminating the need for manual measuring and expertise.

- Users insert a capsule containing the filter and the correct coffee amount.
- The device autonomously drips water consistently and evenly, requiring no specialized skills.

The development journey included extensive exploration and numerous idea concepts. Now, our product is being evaluated by several leading and prominent coffee suppliers.
