March 2024

Rotating equipment
Cooling systems

Cooling component for large rotating equipment with high heat generation.

The FRU was adapted to customer's needs: Adjustments for high heat generation, high flow rate, and limited space.

Main Specifications:

- Rotating speed at this application- 0.5 rpm.
- Working pressure- 180 psi.
- Max. pressure 300 psi.
- Curb Weight 120kg.
- Coolant weight 15 kg.
