

BLDC Motors: Vertical Production in India

gevasol Ping

July 1 2024

Reducing Costs and Bottlenecks

Gevasol India integrates in-house technologies to minimize costs and bottlenecks, unlocking new market opportunities locally and globally.

Challenge

- Establish technologies in India for the Gevasol Motion Division's line.
- Ensure consistent, high-quality results.

Solution

- Conduct on-the-job training for engineers in Israel.
- Foster consistency through collaboration, effective communication, and detailed process documentation.
- Build motor test benches and invest in balancing machines.
- Achieve nearly complete vertical production of BLDC electric motors.
