## High-Efficiency Direct-Acting Valve for Precision Spraying and Dosing

### Product Description

The P481 is a 2/2 normally closed, direct-acting valve engineered for controlled spraying applications. Fast response time to opening and closing makes it ideal for spot spraying and ON/OFF applications. With less than 1.5 W power consumption, it can be used on horizontal and vertical boom sprayers with simple activation methods. It is compatible with most commonly used nozzle holders (Arag / TeeJet, etc.).

### Key Features

- Less than 6 ms opening and closing times
- Power Consumption < 1.5 W
- 2 l/min flow @ 1 bar pressure loss
- 10 to 15 V operating range
- Up to 6 bar operating pressure range
